2. Short description of the application

MusicMaven is a web-based social platform that brings together music lovers from all over the world. It is designed to provide a platform for individuals to share their opinions and thoughts on the latest album releases, songs, and artists.

Key Features:
- Login & Registration
- Personalized Review System: Empower users to rate and share their thoughts on:
  - Albums
  - Songs
  - Artists
- Follow other music geeks: Stay updated with the latest music reviews and recommendations from users you follow
- Join the Conversation: Engage with the community by liking reviews
- Discover new music: Explore a list of popular reviews and recommendations from the community, even without logging in

Future ideas:
- Spotify API integration
  - generate a random playlist based on user's input (share it as a post in MusicMaven and let others see it, like it and comment it)

Inheritance, Abstract class ideas:
1. class MusicUnit (Parent)
   a. class Song
   b. class Album
